#### 1. Results of Operations

#### (1) Overview of consolidated business performance

In the global economy in the second quarter of the fiscal year ending March 31, 2019, despite looming concerns that the imposition of tariffs by the United States could trigger trade friction with China and the European Union, business conditions in Japan as well as in the key markets such as the United States, Europe and China continued on a gradual recovery trend.

In such conditions, based on our corporate philosophy of "Everything we do is for our customers," the Group further expanded its overseas production bases in response to calls from existing customers, while in Japan, the Group focused its efforts on expansion of EMS <sup>(Note)</sup> business by pushing forward with enhancement of domestic production facilities and functions, and other measures. Furthermore, in the face of a tight supply situation, which has become tangible since the latter half of the previous fiscal year, in certain electronic components such as power semiconductors and condensers, utmost efforts were made to curtail its effect on the Group's business activities, such as by leveraging the Group's comprehensive capabilities as an independent general trading company for procuring parts and making proposals on alternative products.

As a result of the foregoing, consolidated net sales of the Group decreased by 1% year on year to 115,383 million yen. In terms of income, operating income decreased by 14.2% to 3,772 million yen, ordinary income decreased by 13.9% to 4,049 million yen, and profit attributable to owners of parent decreased by 21.8% to 2,750 million yen.

Net sales were affected particularly by a temporary decline in unit sales due to production adjustments and model switching at major customers. The decline in unit sales had negative effects also on profits, as did upfront expenses of new overseas sites that were at their start-up phase. In comparison with the same period of the previous fiscal year, therefore, net sales and profits both recorded decreases. Still, the progress of operations was in line with the Company's assumptions formed at the beginning of the period, on the back notably of the EMS business, which in general enjoyed robust orders. (Note) Electronics Manufacturing Service: Provision of product development and manufacturing services on an outsourcing basis.

Business segment performance was as follows.

(a) Electronic components (Development, manufacture and sale of semiconductors, general electronic components and other products, the electronics manufacturing service [EMS], and other activities)

In the electronic components business, the EMS business for automotive and air conditioning devices maintained steady performance while business for medical equipment was slow due to model switching and the resulting production adjustments at major customers. Components sales business remained sluggish notably for home electric appliances from the effect of production adjustments at major customers. As a result, consolidated net sales decreased by 2.9% to 83,455 million yen and segment income declined by 14.5% to 2,474 million yen.

(b) Information equipment (Sales of PCs, PC peripherals, home electric appliances, photograph and imaging products, original brand products, and other products)

In the information equipment segment, sales of housing-related home electric appliances and commercial facilitiesrelated LED installation business continued the robust trend. On the other hand, sales of PCs and PC peripherals were slow due to sluggish market conditions. As a result, consolidated net sales decreased by 9.8% to 21,143 million yen and segment income declined by 22.6% to 864 million yen.

(c) Software (Computer graphics video production, planning and development of amusement products, and other activities)

In the software business, orders for production of computer graphics animation and development of game software were robust. As a result, consolidated net sales increased by 23.0% to 1,404 million yen and segment income increased by 28.1% to 143 million yen.

(d) Others (Repair and support for electronics equipment, manufacture and sales of amusement equipment, sales of sports goods, and other activities)

In others, recycling of PC products and PC peripherals, and sales of arcade amusement machines continued strong, while sales of golf products remained sluggish. As a result, consolidated net sales increased by 54.4% to 9,379 million yen and segment income increased by 9.2% to 216 million yen.

(2) Overview of financial conditions

(a) Assets, liabilities and net assets

Total assets as of September 30, 2018 increased by 2,056 million yen from March 31, 2018 to 130,811 million yen. Current assets increased by 194 million yen to 104,264 million yen. This is primarily attributed to an increase of 1,493

million yen in raw materials and supplies, offsetting a decrease of 1,448 million yen in notes and accounts receivable-trade.

Non-current assets increased by 1,861 million yen to 26,547 million yen. This is largely a result of an increase of 1,607 million yen in investment securities.

Liabilities decreased by 559 million yen to 57,564 million yen. This is primarily attributed to a decrease of 1,011 million yen in notes and accounts payable–trade, despite an increase of 1,345 million yen in short-term loans payable.

Net assets increased by 2,615 million yen to 73,247 million yen. This is largely a result of recording 2,750 million yen in profit attributable to owners of parent.

#### (b) Cash flows

Cash and cash equivalents as of September 30, 2018 decreased by 3,370 million yen from March 31, 2018 to 25,509 million yen.

(Operating activities)

Net cash and cash equivalents provided by operating activities was 1,898 million yen, mainly due to recording profit before income taxes.

(Investing activities)

Net cash and cash equivalents used in investing activities was 4,938 million yen, mainly due to payment into time deposits.

(Financing activities)

Net cash and cash equivalents used in financing activities was 685 million yen, mainly due to cash dividends paid and repayments of long-term loans payable.

#### (3) Qualitative information on consolidated earnings forecast

In the electronics industry, the principal sector of operations of the KAGA ELECTRONICS Group ("the Group"), demand for electronic parts continues to grow, notably with expansion of the market for automotive devices where digital and cyber trends are making headway, as well as increase in the demand for storage in response to the needs of the era of big data against the backdrop of the IoT. On the other hand, the supply side's efforts to increase production tend to fall behind and, since the latter half of the previous consolidated fiscal year, a tight supply-demand situation has become tangible in certain components and materials.

Given significant uncertainties for the future as described above, the Company refrained from presenting, at the beginning of the fiscal year, the full year performance forecast for the fiscal year ending March 31, 2019. However, at this time, the consolidated performance forecast for the full fiscal year ending March 31, 2019 has been calculated as presented below, based on consolidated financial results for the six month period ended September 31, 2018, as well as the recent market trends. The forecast also incorporates the September 10, 2018 announcement "Notice Regarding Acquisition of Shares in Fujitsu Electronics Inc. (and Making It a Subsidiary)" and its effects on net sales and profits.

#### • Revision of Consolidated Performance Forecast

Revised consolidated performance forecast for the full fiscal year ending March 31, 2019 (From April 1, 2018 to March 31, 2019)
