1. Results of Operations

(1) Overview on consolidated business performance

In the first three quarters of the fiscal year, the U.S. economy began to recover due to a break in the sharp upturn in crude oil prices that was caused by turmoil in the Middle East. But in the third quarter, the U.S. economic situation was unstable as fears about a slowdown mounted because of the debt crisis in Europe, a weak housing market, the slow recovery in employment and other issues. In Europe, the economy became increasingly weaker as the sovereign debt crisis in Greece spread to create instability in the entire financial system. In China and other emerging countries as well, economic growth rates declined due to measures to control inflation and the impact of slowing economic growth in industrialized countries. Overall, global economic growth has been slowing as a result.

In Japan, toward the summer the economy began to stage a recovery from the downturn following the Great East Japan Earthquake along with the emergence of demand backed by reconstruction activity as supply chains were restored. However, the economic outlook is uncertain because of slowing global economic growth, a strong yen and weak stock prices, the impact of flooding in Thailand on manufacturing and other events.

In the electronics industry, there was growth in demand for smartphones, tablet computers and some other products. There was also a rush to buy flat-screen televisions following the start of terrestrial digital TV broadcasts in Japan. But there was a drop in sales of flat-screen televisions, digital home electronics and other consumer electronics starting in the summer. In addition, the impact of flooding in Thailand on shipments of electronic components and semiconductors made the operating environment even more difficult.

In this environment, the KAGA ELECTRONICS Group further increased solidarity among group companies in Japan and overseas and conducted effective sales activities. Activities also included adding new products and taking steps to increase sales of environmental products like LED lamps. Despite these initiatives, sales and earnings were lower than one year earlier mainly because of the difficult business environment in the electronics industry and losses to fixed assets, inventories and other items caused by flood damage at a factory in Thailand.

Consolidated net sales in the first three quarters decreased 2.2% to 173,690 million yen, operating income fell 60.2% to 1,276 million yen, ordinary income was down 55.2% to 1,402 million yen and there was a net loss of 356 million yen compared with net income of 1,431 million yen one year earlier.

Losses to fixed assets, inventories and other items due to flooding in Thailand are covered by insurance. Since insurance payments are expected to be received in the fourth quarter of the current fiscal year, these losses will have no effect on consolidated results of operations for the fiscal year.

Business segment performance was as follows.

(a) Electronic components (Development, manufacture and sale of semiconductors, general electronic components and other products, electronic manufacturing service (EMS)*, and other activities)

During the first three quarters, there were measures to secure procurement channels for semiconductors and electronic components where shortages occurred after the Great East Japan Earthquake. Group companies also focused on increasing sales to current customers and enlarging sales channels for LED products and solar panels. Environmental products have attracted particularly strong attention in Japan after the earthquake. Overseas, there were extensive activities to increase sales to Japanese client companies, companies in China and other companies.

However, sales of electronic components and semiconductors and EMS orders were lower in Japan. The primary cause was a decline in output by client manufacturers in response to the Great East Japan Earthquake and weakening consumer spending. Overseas, sales were impacted by lower output by client manufacturers because of flooding in Thailand and by other events. The result was a 2.5% decrease in segment sales to 124,428 million yen and a 51.6% decrease in operating income to 1,223 million yen.

- * Electronics manufacturing service is a term used for the provision of product development and manufacturing services on an outsourcing basis.
- (b) Information equipment (Sales of PCs, PC peripherals, photograph and imaging products, original-brand products, and other products)

The performance of this segment was impacted by the Great East Japan Earthquake, the downturn in consumer spending in Japan that started in the summer, and a lower supply of products sold in this segment because of flooding in Thailand. Despite these challenges, sales were higher because of measures to increase sales of PCs, PC peripherals and other existing products and add new products. In addition, orders for terrestrial digital TV broadcast tuners increased due to the July 2011 end of terrestrial analog TV broadcasts in Japan. Segment sales increased 1.6% to 39,332 million yen but a decline in sales of products with a high gross profit margin and a provision for the allowance for doubtful accounts resulted in an operating loss of 188 million yen compared with operating income of 256 million yen one year earlier.

(c) Software (Production of computer graphics, planning and development of amusement products, and other activities)

Group companies focused on the production of computer graphics for animation, the development of image processing for amusement devices, and sales of game and application software. However, additional time required for development projects, delays in the start of sales and other factors caused segment sales to fall 33.2% to 2,445 million yen and operating income to decrease 75.6% to 66 million yen.

(d) Others (Electronic device repairs and support, sales of sporting goods, and other activities)

The Great East Japan Earthquake caused demand to fall in the golf product sales business and reduced orders in the recycling business and other activities in this segment. Although there was a recovery in recycling orders in the third quarter, segment sales decreased 0.3% to 7,484 million yen and operating income decreased 11.7% to 243 million yen.

(2) Overview of financial condition

Assets totaled 114,675 million yen at the end of the third quarter, 11 million yen less than at the end of the previous fiscal year mainly because of a decrease in cash and cash equivalents.

Liabilities increased 2,664 million yen to 68,752 million yen mainly because of a increase in short-term bank loans.

Net assets decreased 2,675 million yen to 45,922 million yen. This was attributable primarily to dividend payment and decrease of other comprehensive income.

(3) Forecast for fiscal year ending in March 2012

Based on the consolidated operating results for the first three quarters, we have revised the forecast for the current fiscal year that was announced on October 28, 2011.

(a) Consolidated forecast for the fiscal year ending March 2012 (April 1, 2011 – March 31, 2012)

	Net Sales	Operating income	Ordinary income	Net income	Net income per share
	Million yen	Million yen	Million yen	Million yen	Yen
Previous forecast (A)	238,000	2,100	2,600	1,300	47.11
Revised forecast (B)	227,000	1,600	2,100	950	34.42
Difference (B-A)	-11,000	-500	-500	-350	-
(Ref.) Previous fiscal year	237,951	3,563	3,738	1,854	67.20

(b) Reason for revisions

Consolidated sales in the current fiscal year are expected to fall below the previous forecast. One reason is a temporary downturn in electronic component, semiconductor and EMS sales as client manufacturers reduced output because of the difficulty of procuring parts and materials due to the Great East Japan Earthquake and flooding in Thailand. Sales have also been affected by a decline in sales of PCs, PC peripherals and other computer products because of economic weakness in Japan.

Losses to fixed assets, inventories and other items due to flooding in Thailand are covered by insurance. Since substantial insurance payments are expected to be received in the fourth quarter, the revised forecast shown above includes these insurance payments.

2. Other Information

- (1) Changes in significant subsidiaries:
- (2) Use of of accounting methods specifically for the preparation of the quarterly consolidated financial statements: None
- (3) Changes in accounting principles and estimates, and retrospective restatement: None
