## 1. Results of Operations

(1) Overview of consolidated business performance

In the third quarter of the fiscal year ending March 31, 2019, the Japanese economy witnessed a continued gradual recovery as a result of factors including an improvement in the employment and wage environment and strong corporate earnings. Nonetheless, the future continues to look uncertain due to factors that include a slowdown in the Chinese economy stemming from the prolongation of trade friction between the US and China and resulting concerns over a downturn in the global economy.

In such conditions, based on our corporate philosophy of "Everything we do is for our customers," the Group further expanded its overseas production bases in response to calls from existing customers, while in Japan, the Group focused its efforts on expansion of $E M S^{(\text {Note })}$ business by pushing forward with enhancement of domestic production facilities and functions, and other measures. Furthermore, in the face of a tight supply and demand situation, which has become tangible since the latter half of the previous fiscal year in certain electronic components, such as power semiconductors and condensers, utmost efforts were made to curtail its effect on the Group's business activities, such as by leveraging the Group's comprehensive capabilities as an independent general trading company for procuring parts and making proposals on alternative products, despite the difficult conditions for the automotive and air conditioning devices business.

As a result of the foregoing, consolidated net sales of the Group decreased by $0.2 \%$ year on year to 173,782 million yen. In terms of income, operating income decreased by $13.1 \%$ to 5,748 million yen, ordinary income decreased by $15.4 \%$ to 6,000 million yen, and profit attributable to owners of parent decreased by $11.5 \%$ to 4,875 million yen.

Although net sales were affected, particularly by a temporary decline in unit sales due to production adjustments and model switching at major customers, the EMS business generally enjoyed robust orders, so net sales remained mostly unchanged year on year. On the other hand, profits recorded decreases due to factors including upfront expenses of new overseas sites that were at their start-up phase. Income taxes decreased due to the impact of tax effect accounting.
(Note) Electronics Manufacturing Service: Provision of product development and manufacturing services on a contracting basis.

Business segment performance was as follows.
(1) Electronic parts (Development, manufacture and sale of semiconductors, general electronic parts, the electronics manufacturing service [EMS], and other activities)
In this business, the EMS business for automotive and air conditioning devices maintained steady performance while business for medical equipment was slow due to model switching and the resulting production adjustments at major customers. Components sales business remained sluggish notably for home electric appliances from the effect of production adjustments at major customers. As a result, consolidated net sales in the third quarter of the fiscal year ending March 31, 2019 decreased by $3.2 \%$ to 124,893 million yen and segment income declined by $16.2 \%$ to 3,780 million yen.
(2) Information equipment (Sales of PCs, PC peripherals, home electric appliances, photograph and imaging products, original brand products, and other products)
In this segment, although the commercial facilities-related LED installation business continued a robust trend, sales in the housing-related home electric appliances business decreased as a result of factors including delivery date adjustments by customers. In PC sales, although sales were strong for individuals, sales were sluggish for corporate customers. As a result, consolidated net sales in the third quarter of the fiscal year ending March 31, 2019 decreased by $6.8 \%$ to 32,374 million yen and segment income declined by $19.3 \%$ to 1,339 million yen.
(3) Software (Computer graphics video production, planning and development of amusement products, and other activities)

In this business, orders for production of computer graphics animation and development of game software were robust. As a result, consolidated net sales in the third quarter of the fiscal year ending March 31, 2019 increased by $26.1 \%$ to 1,943 million yen and segment income increased by $33.2 \%$ to 122 million yen.
(4) Others (Repair and support for electronics equipment, manufacture and sales of amusement equipment, sales of sports goods, and other activities)
In this business, sales of arcade amusement machines continued strong. In addition, while the PC products and PC peripherals recycling business performed strongly, sales of golf products remained sluggish. As a result, consolidated net sales in the third quarter of the fiscal year ending March 31, 2019 increased by $67.4 \%$ to 14,570 million yen and segment income increased by $75.8 \%$ to 415 million yen.
(2) Overview of financial conditions

Assets, liabilities and net assets
Total assets as of December 31, 2018 increased 24,129 million yen from March 31, 2018 to 152,885 million yen
Current assets increased by 21,397 million yen to 125,467 million yen. This is primarily attributed to an increase of 24,202 million yen in "Other" due to factors such as advance payments related to the acquisition of shares in Fujitsu Electronics Inc.

Non-current assets increased by 2,732 million yen to 27,418 million yen. This is primarily attributed to increases of 814 million yen in deferred tax assets, 759 million yen in investment securities, and 576 million yen in construction in progress.

Liabilities increased by 21,824 million yen to 79,948 million yen. This is primarily attributed to an increase of 24,145 million yen in short-term loans payable.

Net assets increased by 2,305 million yen to 72,937 million yen. This is largely a result of recording 4,875 million yen in profit attributable to owners of parent
(3) Qualitative information on consolidated performance forecast

There are no changes to the consolidated performance forecast for the fiscal year ending March 31, 2019 from that announced in "Summary of Consolidated Financial Results for the First Half Ended September 30, 2018" dated November 6,2018
